The reports of the executive related the history of the early Vers for, and modern-least respectively by first H A. Barrows v. H. Bearter and I. N. Ferne and the property of the production of the production of the care of the history of the histo only the transfer of the state taking away the power of nomination were made comparatively rescritly. They posure to the sick one and yesting the power of appointment have done as much for civilization as "The next question which science" this bill believing that the old bill part as a clearing house of ideas. The and can confer immunity upon men by of the arrangements for another auction was a good one on the grounds that it took the office out of politics, that it upon the future of the society as he saw, and put forth his observations on inocuobviated the danger of a lay appointment, and lastly because it gives the governor the power of choice between two candidates in case one is not comotent. The judiciary committee after tenring the arguments, withdrew the

mittee on medical education. The report showed that the number of medical stu-2,771 and the number to graduate was 562 less than the preceding year. This might at first appear to mean that the interest in medicine was lagging but this was not the case as the higher requirements for entrance to medical colleges was responsible. In the past year it medical colleges have either suspended or merged with others and two new ones have been organized, leaving 100 medical colleges now existing. While the total number of colleges is decreasing the number of stronger achoos is constantly on the increase Where in 1904 only four medical colleges required preliminary education beyond that of the ordinary high school. or more years of advanced college work and 28 others begin higher requires. ments next year. The next great wave of man has something of his own that you and its cure. With proper measures this to-night's session Improvement is the closer union between can copy. The county society is the disease could be nearly stamped out in a colleges and hespitals, where each hospitals stone of medical organization single generation.
